Esercizio 21-02

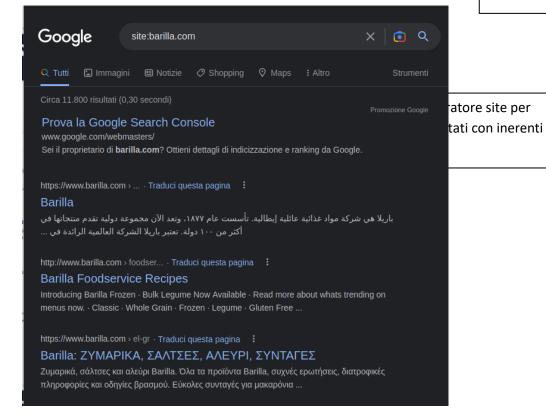

Traccia: produrre un piccolo report con un target da analizzare e che indichi quali informazioni si sono ottenute con quale tool di analisi (Google, recon-ng, Maltego, dmitry).

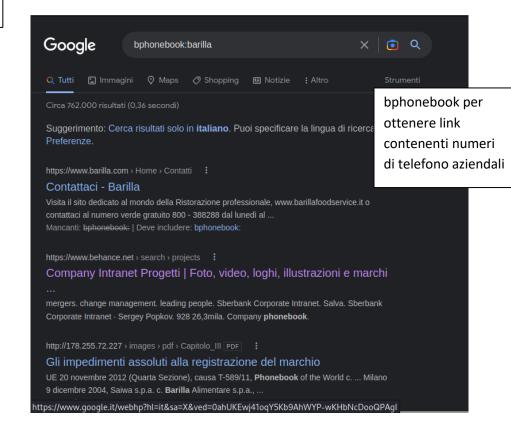

Il report dovrà contenere:

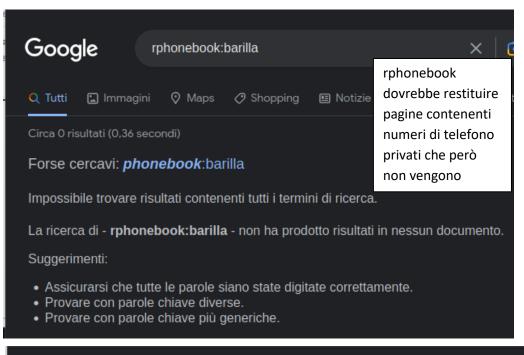

- Il target
- Le query utilizzate (dove applicabile)
- I moduli utilizzati (dove applicabile)
- I risultati ottenuti

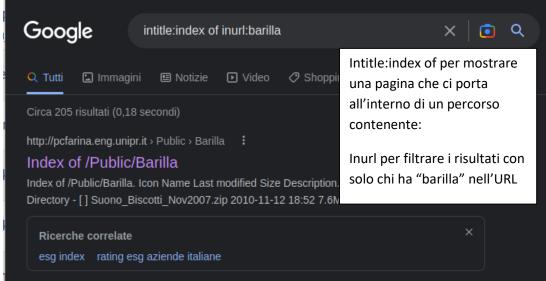

Decido di prendere come target: Barilla

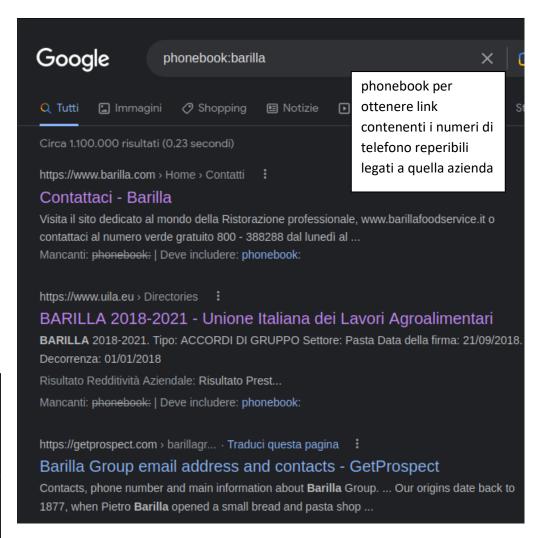

Tools di Google

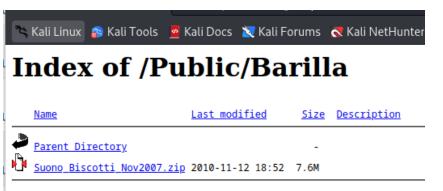

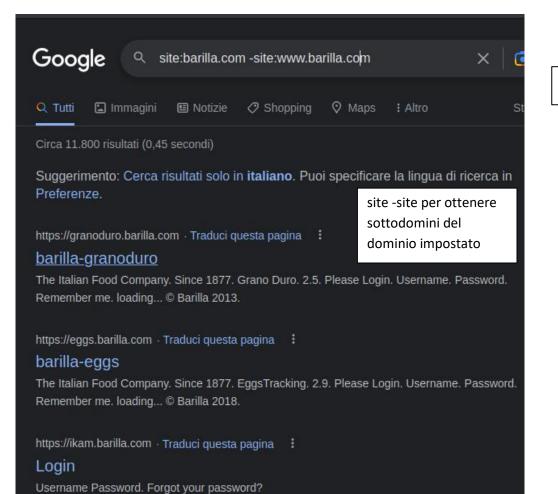

Recon -ng

```
[recon-ng][default][whois_pocs] > options set SOURCE barilla.com
SOURCE ⇒ barilla.com
[recon-ng][default][whois_pocs] > run
BARILLA.COM
